

HUMAN FACTORS AND THE APPLICATION OF USE OF FORCE

This class reviews the effect of human factors on officers during critical incidents and the application of force from a federal, statutory, policy, and officer perspective:

- The concept behind thinking fast and slow
- The Recognition Primed Decision Model
- How danger impacts the 3 primary survival systems
- Threat capabilities
- The impact of attention and reaction time on an officer's response
- Looming, contra-lateral contractions, and slips and capture errors
- Influence of officer movement on traffic stops
- Federal standard for use of force
- Statutory standard for use of force (SB-217)
- Diminished mental capacity and UOF
- Threat assessment and UOF from an officer's perspective
- Officer created jeopardy
- De-escalation
- Medical considerations
